

Project Name

Energy in Transition

Project aim(s)

The main aim is to lower all householder energy usage by at least 5% by engaging with over 1,000 households.

Think – How can I reduce the amount of energy I use at home?

- Get advice on how to reduce your energy use

Act – Take steps to lower how much energy use at home

- A home energy visit will identify ways you can lower your usage

Save – Reduced usage means reduced energy bills and a saving for the environment

- Part of your effort to reduce you carbon footprint

Project scope and size

Taking a climate conscious approach to energy efficiency the Energy in Transition roadshow seeks to engage householders to reduce their energy use to play their part in reducing community carbon emissions. The roadshow hosts and attends a variety of events to recruit participants and offers free home energy advice visits as well as making referrals for insulation measures or heating upgrades.

Staff involvement

The project is being delivered by project officers, Alana Martin and Finlay MacLennan who are both managed by Dan Morrison, Energy Services Director.
